Election Beacon

Candidate Survey: Preparation Worksheet

Use this worksheet to prepare your answers to the 30 policy statements before you take the survey. For each statement, select one response and, if you wish, add a short comment explaining your position. Comments are optional and limited to 800 characters.

This worksheet is for your preparation only. Your answers count once you enter them in your candidate account and submit the survey. Your responses and comments will be shown publicly on your candidate profile.

Economy and cost of living

1. The current administration's tariff policies are hurting the US economy.

○ Strongly disagree ○ Disagree ○ Somewhat disagree ○ Somewhat agree ◉ Agree ○ Strongly agree

Optional comment (800 characters maximum)

LND, The official Black Dollar is my proposed buffer against price shocks and trade disruption. My economic research prioritizes measurable effects on households, small businesses, prices, and trade. I would assess tariffs by their documented costs and benefits rather than political affiliation.

2. The federal government should spend more on public housing programs.

○ Strongly disagree ○ Disagree ○ Somewhat disagree ○ Somewhat agree ◉ Agree ○ Strongly agree

Optional comment (800 characters maximum)

One the federal government prints LND. LND is my central financial-relief mechanism for housing stability and development. My housing relief strategy includes the Loc Nation Dollar (LND), SOLN ' s restitution-designated financial instrument, to support housing stability, address redlining, and expand access to housing and community investment through participating institutions.

3. Minimum wage should be increased to a level that covers all basic living expenses.

○ Strongly disagree ○ Disagree ○ Somewhat disagree ○ Somewhat agree ○ Agree ◉ Strongly agree

Optional comment (800 characters maximum)

LND financial relief is intended to supplement wages and help households meet essential costs. A living wage matters, but wages alone do not repair centuries of excluded wealth. My LND financial relief framework is designed to supplement household purchasing power, support essential expenses, and increase access to business ownership and economic opportunity.

4. The government should increase spending to stimulate the economy during downturns.

- (●) Strongly disagree
- ( ) Disagree
- ( ) Somewhat disagree
- ( ) Somewhat agree
- ( ) Agree
- ( ) Strongly agree

Optional comment (800 characters maximum)

The government should print LNd, The official Black dollar. LND restitution allocations are my primary proposed channel for economic relief and investment. LND is central to my financial relief strategy: SOLN has designed restitution-linked allocations for households, small businesses, and community infrastructure. I advocate measurable relief and sustainable development rather than relying exclusively on conventional federal stimulus.

5. High-income earners and corporations already pay enough in federal taxes.

- ( ) Strongly disagree
- ( ) Disagree
- ( ) Somewhat disagree
- ( ) Somewhat agree
- ( ) Agree
- ( ) Strongly agree

Optional comment (800 characters maximum)

LND financial relief and accountable community investment are central to my economic approach beyond tax rates. Tax policy should be evaluated for fairness, actual effective burdens, economic effects, and whether public resources deliver measurable results. My published restitution research does not establish a specific answer to this statement.

Healthcare

6. Cuts to Medicaid hurt more Americans than they help.

- ( ) Strongly disagree
- ( ) Disagree
- ( ) Somewhat disagree
- ( ) Somewhat agree
- (●) Agree
- ( ) Strongly agree

Optional comment (800 characters maximum)

LND is intended to expand household capacity to access care and address financial barriers. My restitution framework includes healthcare access and household financial relief through LND. Cuts that remove access to necessary care undermine family stability; LND is intended to support broader economic security, subject to actual acceptance and implementation.

7. Affordable healthcare should be considered a basic right.

- ( ) Strongly disagree
- ( ) Disagree
- ( ) Somewhat disagree
- ( ) Somewhat agree
- ( ) Agree
- (●) Strongly agree

Optional comment (800 characters maximum)

LND-based relief is intended to support healthcare affordability alongside access protections. Affordable healthcare is essential to dignity. SOLN ' s LND-based financial relief framework is intended to strengthen household capacity to meet healthcare and other essential needs alongside institutional improvements.

8. The government should be able to mandate vaccination during a public health emergency.

Strongly disagree	Disagree	Somewhat disagree	Somewhat agree	Agree	Strongly agree
○	◉	○	○	○	○

Optional comment (800 characters maximum)

Public health policy should protect communities while addressing informed consent, medical evidence, individual rights, and proportionality.

Government & democratic functioning

9. Requiring two forms of identification to vote would exclude more eligible voters than fraudulent ones.

Strongly disagree	Disagree	Somewhat disagree	Somewhat agree	Agree	Strongly agree
○	○	○	○	◉	○

Optional comment (800 characters maximum)

LND can fund access to voter information and participation; voting rights still require enforceable legal safeguards. My research documents political exclusion and gerrymandering. Election security must not create unnecessary barriers for eligible voters; requirements should be tested against actual evidence and access.

10. Congressional redistricting should be handled by independent, nonpartisan commissions rather than state legislatures.

Strongly disagree	Disagree	Somewhat disagree	Somewhat agree	Agree	Strongly agree
○	○	○	○	○	◉

Optional comment (800 characters maximum)

LND can support civic access and public education, while independent districting requires legal reform. My research identifies gerrymandering and underrepresentation as structural harms. Transparent, independent redistricting with public scrutiny better protects equal representation.

11. Supreme Court justices should be subject to mandatory term limits.

Strongly disagree	Disagree	Somewhat disagree	Somewhat agree	Agree	Strongly agree
○	○	○	○	○	◉

Optional comment (800 characters maximum)

LND can support equal access to legal services; judicial term limits require separate constitutional consideration. Judicial accountability and impartiality matter. My very own DC 1:24 cv 00479 RC and appeal DC 24- 5263 is evidence of abuse of authority when an authority is comfortable.

12. Congress has done a good job of keeping the executive branch in check.

Strongly disagree	Disagree	Somewhat disagree	Somewhat agree	Agree	Strongly agree
○	◉	○	○	○	○

Optional comment (800 characters maximum)

LND can support independent public institutions, while checks on power require enforceable oversight.
My governance research calls for stronger checks, enforceable rights, transparency, and institutional accountability. These principles require meaningful oversight of executive authority.

13. Unlimited corporate spending on elections should be restricted.

Strongly disagree	Disagree	Somewhat disagree	Somewhat agree	Agree	Strongly agree
○	○	○	○	◉	○

Optional comment (800 characters maximum)

LND-backed community development seeks to reduce financial exclusion; campaign finance also requires legal safeguards. Democratic representation should not depend on unequal access to money. I support transparency, accountability, and protecting voters from disproportionate political influence.

14. Members of Congress should be legally prohibited from trading individual stocks while in office.

Strongly disagree	Disagree	Somewhat disagree	Somewhat agree	Agree	Strongly agree
○	○	○	○	◉	○

Optional comment (800 characters maximum)

LND can support public accountability infrastructure; conflict-of-interest restrictions require enforceable ethics laws. Public officials must avoid conflicts between private financial interests and public duties. Clear ethics standards and enforceable disclosure support public trust.
We can consider higher wages per community governed/workload

Crime & Public safety

15. Some public safety responsibilities, such as mental health crises and homelessness, should be handled by social services rather than law enforcement officers.

Strongly disagree	Disagree	Somewhat disagree	Somewhat agree	Agree	Strongly agree
○	○	○	○	○	◉

Optional comment (800 characters maximum)

LND relief is intended to finance housing stability, prevention, and community-based response services. Housing and mental health emergencies call for appropriate services. SOLN ’ s LND financial relief strategy is designed to help address underlying household instability while public safety agencies focus on the situations they are equipped to handle.

16. Stricter gun laws would do little to reduce gun violence.

○ Strongly disagree ○ Disagree ○ Somewhat disagree ○ Somewhat agree ○ Agree ○ Strongly agree

Optional comment (800 characters maximum)

LND can support violence prevention and youth opportunity, but financing alone does not settle firearm policy. I support evidence-based violence prevention and protection of constitutional rights.

17. Law enforcement agencies should face greater oversight and accountability.

○ Strongly disagree ○ Disagree ○ Somewhat disagree ○ Somewhat agree ○ Agree ◉ Strongly agree

Optional comment (800 characters maximum)

LND can support legal access and community oversight, alongside enforceable accountability protections. SOLN has published police accountability and wrongful-arrest protections. Oversight, due process, and remedies for abuse of power are central to this work.

18. Rehabilitation should be a higher priority than punishment in the prison system.

○ Strongly disagree ○ Disagree ○ Somewhat disagree ○ Somewhat agree ◉ Agree ○ Strongly agree

Optional comment (800 characters maximum)

LND can support education, reentry, employment, and rehabilitation services. My protective-law framework emphasizes equal treatment, justice, prevention of abuse, and meaningful restoration. Rehabilitation can reduce repeat harm while preserving accountability.

Immigration

19. The U.S. should significantly strengthen border security.

○ Strongly disagree ○ Disagree ○ Somewhat disagree ○ Somewhat agree ◉ Agree ○ Strongly agree

Optional comment (800 characters maximum)

LND can support lawful humanitarian and administrative services; border-security levels remain a separate policy choice. Border management should be lawful, effective, and consistent with human rights.

20. Children brought to the U.S. without documentation should have a path to citizenship.

Strongly disagree	Disagree	Somewhat disagree	Somewhat agree	Agree	Strongly agree
○	○	○	○	○	○

Optional comment (800 characters maximum)

America is the land where dreams come to reality. LND can support education and family stability, but citizenship pathways require federal law. Childrendeserve due process and humane treatment.

21. Immigrants in the U.S. already receive more legal protection than they should.

Strongly disagree	Disagree	Somewhat disagree	Somewhat agree	Agree	Strongly agree
○	◉	○	○	○	○

Optional comment (800 characters maximum)

LND can support community integration and legal access, alongside due-process protections. My governance work emphasizes due process, equal treatment, and protection against abuse of power. Legal protections should be evaluated against those principles, not removed categorically. We are all human first

Environment & climate change

22. Climate change requires urgent government action.

Strongly disagree	Disagree	Somewhat disagree	Somewhat agree	Agree	Strongly agree
○	○	○	○	○	○

Optional comment (800 characters maximum)

LND community investment could support resilience and adaptation, subject to implementation and measurable outcomes. Environmental decisions should be grounded in measurable risks, scientific evidence, and protection of vulnerable communities. My reviewed publications do not set out a definitive climate-action timetable as of yet.

23. The government should significantly increase investment in renewable energy.

Strongly disagree	Disagree	Somewhat disagree	Somewhat agree	Agree	Strongly agree
○	○	○	○	○	○

Optional comment (800 characters maximum)

LND could finance community renewable-energy projects through participating institutions. Energy infrastructure should serve historically underfunded communities. SOLN ’ s LND community-investment framework offers a potential financing pathway, but my published work does not establish a specific commitment to significantly increase federal renewable-energy spending.

24. Nuclear energy should be a central component of the U.S. strategy to reduce carbon emissions.

Strongly disagree	Disagree	Somewhat disagree	Somewhat agree	Agree	Strongly agree
○	○	○	○	○	○

Optional comment (800 characters maximum)

LND could support evaluation of energy infrastructure, but does not establish a preference for nuclear energy. Energy strategy should consider reliability, safety, cost, waste management, and emissions. I have not established a public position making nuclear power the central solution.

25. Environmental regulations do more harm than good to the economy.

Strongly disagree	Disagree	Somewhat disagree	Somewhat agree	Agree	Strongly agree
○	○	○	○	○	○

Optional comment (800 characters maximum)

LND investment could help communities and businesses meet environmental standards. Environmental protections and economic development should be assessed using evidence of public health, business costs, and long-term impacts. The reviewed materials do not resolve this statement.

Technology

26. The federal government should set strict standards for AI.

Strongly disagree	Disagree	Somewhat disagree	Somewhat agree	Agree	Strongly agree
○	○	○	○	◉	○

Optional comment (800 characters maximum)

LND financial systems should include transparent, auditable AI and strong consumer protections. AI systems that affect rights, livelihoods, public services, and financial decisions need transparency, auditability, accountability, and protection against discrimination

27. The government should reduce the regulatory barriers to building new data centers.

Strongly disagree	Disagree	Somewhat disagree	Somewhat agree	Agree	Strongly agree
○	◉	○	○	○	○

Optional comment (800 characters maximum)

LND investment could support community-benefit infrastructure, subject to energy, water, and oversight requirements. Data center development should be assessed for power and water demands, local jobs, infrastructure capacity, and community benefit

Other social issues

28. Access to abortion should be protected by law.

Strongly disagree	Disagree	Somewhat disagree	Somewhat agree	Agree	Strongly agree
○	○	○	○	◉	○

Optional comment (800 characters maximum)

There are many variations to what may bring a woman to this decsion.

29. Federal law should guarantee all workers a minimum number of paid vacation days annually.

Strongly disagree	Disagree	Somewhat disagree	Somewhat agree	Agree	Strongly agree
○	○	○	○	◉	○

Optional comment (800 characters maximum)

LND relief is intended to ease household insecurity alongside labor protections. Paid time off supports family wellbeing. My broader economic program also centers LND financial relief to reduce household insecurity and strengthen economic opportunity; the exact federal vacation mandate remains a policy choice.

30. Funding college education is not the government’s responsibility.

Strongly disagree	Disagree	Somewhat disagree	Somewhat agree	Agree	Strongly agree
○	◉	○	○	○	○

Optional comment (800 characters maximum)

LND educational allocations and student-debt relief are central to my education affordability approach. Government has a role in education access. SOLN has published LND-denominated student-debt relief instruments as part of its restitution program, alongside its broader education and financial relief priorities.
We want our community educated to contribute to the innovation of tomorrow.
